# Welcome

Thank you for choosing Triangle Surgical, we believe that it is our job to make life easy for you. We do this by listening to your requirements, advising you when you ask for suggestions, ensuring you get a sensible price and making sure that what you order is sent when you want it – usually the next day.

We are a long established family run company with staff who have all been with the company for well over ten years – some with over 25 years involvement. Hence we have a significant combined experience in the sector of Cosmetics, Aesthetics and Reconstruction. We take great pleasure and pride in our team's outstanding reputation for quality of service and in-depth product knowledge.

Our focus is on designing, sourcing and marketing superior products that offer real advantage and advancement to the doctor and nursing team.

We make our own cannula enabling us to provide the widest possible range available and also offer a bespoke, made to measure service. Our CETTA (single use) and PRIMO (reusable) cannula are recognised as the market leader in many countries for both choice and quality.

Within this catalogue we showcase a comprehensive range of products which have a proven track record with medical professionals and patients. We offer quality products for all aspects of liposuction and fat transfer along with our optimum comfort compression garments.

You can be confident in the knowledge that all the products we offer are fully compliant and CE certified. We are on the NHS & MIA Register, fully insured and committed to patient safety.

*We are Peppol compliant with e-procurement catalogues available via numerous providers, including Nexus and Virtualstock-the Edge.*

Our website: [www.trianglesurgical.uk](http://www.trianglesurgical.uk)

**CE** All of our products meet the required CE certification. CETTA is grade 2 sterile product certified.

## CETTA Disposable - Black

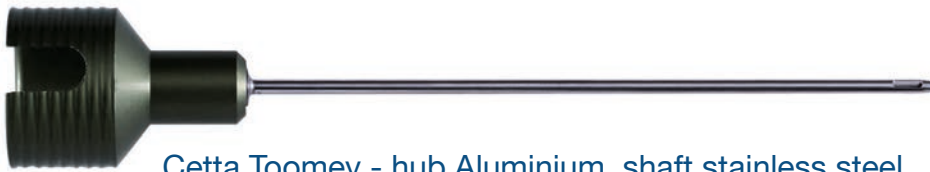

The outstanding quality of the CETTA disposable product range is immediately apparent; high grade medical stainless steel, reassuring weight, excellent balance and superb finish. We strongly believe CETTA is not only the best disposable product available worldwide, but is also far superior to the majority of re-usable cannula available.

Cetta handle: POM

CETTA Cannula - identified by black handles.

Certain styles of handles are made using POM - Polyoxymethylene (An exceptional and recyclable engineering thermoplastic).

Cetta Toomey - hub Aluminium, shaft stainless steel

Cetta handle POM, shaft stainless steel

Cetta luer lock hub and shaft stainless steel

CETTA is single packed for your convenience - and cash flow

We will create custom packs for individual surgeon's requirements.

Unlike other disposable brands, the CETTA luer lock hub is metal meaning the quality is exactly the same as the best available re-usable cannula

**Ask about our custom packs today**

# PRIMO

Autoclavable - Gold

Our re-usable Primo range is as versatile as you need it to be, we will create any bespoke style and size upon request at standard list prices. The range shown in this catalogue is a guide to the most popular sizes and styles we currently provide. Many are regular stock items facilitating fast delivery. Made of durable high quality medical grade stainless steel with reassuringly weighty and balanced Aluminium handles available.

Primo handle: Aluminium

Primo Toomey - hub Aluminium, shaft stainless steel

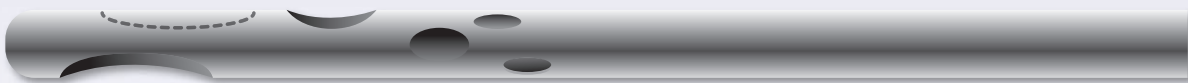

Primo handle Aluminium, shaft stainless steel

Primo luer lock hub and shaft stainless steel

## Feeling Creative?

We often work with surgeons to create their ideal size and tip design of cannula for a given purpose.

**We can create bespoke CETTA and Primo from a basic drawing and description**

**Ask about our bespoke design service today**

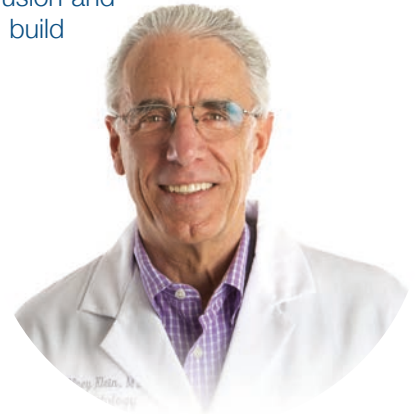

# Fluid Infusion

## We went straight to the inventor of the Technique!

**When It comes to the Tumescence technique we simply could do no better than to partner Dr Jeffrey Klein and his company HK surgical USA.**

Often referred to as the Klein technique the use of Tumescence fluid to improve the comfort and recovery of liposuction surgery has become the worldwide standard since Dr Klein's original work in 1986.

In order to provide the very best equipment for his requirements Dr Klein founded HK surgical, his company has become a recognised world leader in the specialist supply of the devices and instrumentation needed for the procedure. We have worked with many devices over the years for both infusion and suction and can confirm that the HK products are exceptional in design and build quality. We are extremely proud to be working with them.

Dr Jeffrey Klein

# HK

## SURGICAL

### The Complete Tumescence Solution

HK Surgical is the recognised leader in the development of highly specialized Tumescence Local Anesthesia products in the medical device industry.

CAN'T FIND WHAT YOU'RE LOOKING FOR?

**WE'RE HAPPY TO HELP!**

# Infiltration Pumps

Infiltration of large volumes of tumescent anesthesia can optimise patient comfort and procedure result.

However, this can be a laborious job using a hand held syringe and on large cases a pump for infiltration is an excellent solution.

A practical way of greatly reducing expensive theatre time, and reducing the very real physical stresses experienced by the surgeon during a large procedure.

## The Klein KIP Pump

The Klein KIP11 pump, although small and manageable, is a little power-house with a 0-600rpm motor producing flow rates of up to 1000ml per minute.

It's a well-considered piece of engineering design with clever touches such as two footswitch ports allowing that one pedal can be positioned either side of the O.R. table for ease and time saving.

The only infiltration pump on the market with a non-conductive roller head is an important additional safety feature.

We think this ultra reliable little device is a very wise investment.

*Please get in contact for full spec details.*

### Product Code

THK-KIP11

## The Klein Touch Pump

The new Klein Touch Pump features an LCD touch screen, precision .01 rate increments and the flow rate of up to 1000ml/min. This new well engineered Klein touch pump can be operated from the LCD screen or from one of the three foot pedal ports. It can be pre-programmed and has robust switches with solid and reliable foot pedals.

We strongly believe that this is an efficient, essential, quality device designed to provide consistent results.

Maintenance free brushless motor.

Can be battery operated (optional and can be purchased separately).

*Please get in contact for full spec details.*

### Product Code

THK-KTP

## Infusion Needles

High grade stainless steel. 6 spaced holes in a spiral around the tip.

For fluid infusion using luer lock syringes, handles or giving set tubing.

<b>CETTA RANGE</b>		<b>PRIMO RANGE</b>	
<b>Product Code</b>	<b>Product Code</b>	<b>Diameter (mm)</b>	<b>Length (cm)</b>

CETTA INF/N1.623CRV	PRIMO INF/N1.623CRV	1.6	23

## Infusion Handle Non Valve

Comfortable handle to link tubing to needle, lack of valve reduces leakage. Single shaft allows infiltration and suction.

### **Product Code**

CETTA INF/HAN W/O

### **Product Code**

PRIMO INF/HAN W/O

## Infusion Handle with Valve

This infusion handle, with on/off button, offers maximum control for infusion during the tumescent technique.

### **Product Code**

PRIMO INF/HAN

## Single Spike Tubing

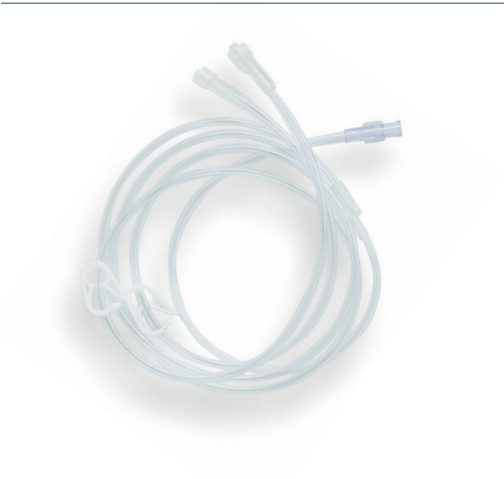

Ideal for use with the HK pump, but will fit all devices

15.5 feet in length.

Latex and DEHP free.

### **Product Code**

THK-ITS-20

## Double Spike Tubing

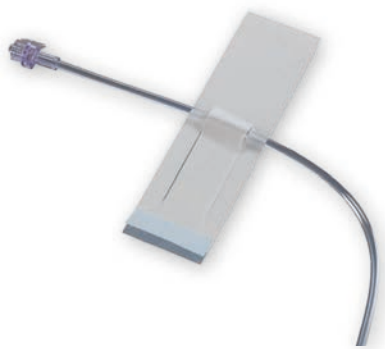

Effort and time saving, two bags of solution at one time. Really good for treating multiple areas that require different solutions without bag changing.

15.5 feet in length.

Latex and DEHP free.

### **Product Code**

THK-ITD-20

## Tube Organiser

As the name explains, a very simple and effective way to organise single/multiple tubing during procedures.

X 100 pieces.

### **Product Code**

THK-TO-100

## Foot Pedal

Sealed and waterproof, additional foot pedals can be used with both the HK infusion pumps or HK aspirator. Useful to have one pedal either side of the operating table.

### **Product Code**

THK-KIP-AP-FP

## I.V. Pole and Bracket

Neatly and safely makes your infiltration system easily mobile around the operating theatre. Extremely stable with 6 legs and a very low centre of gravity.

### **Product Code**

THK-IVPB

## Infiltration Syringe – 30ml, 50ml

Spring loaded with a two way Luer lock valve attached, self-fills on retraction making hand held infusion faster and easier.

May we suggest for those with smaller hands the 30cc for comfort

### **Product Codes**

Syringe – 30ml – INF

Syringe – 50ml – INF

## I.V. Water Bath

A constant warmth water bath offer the advantages of obtaining consistent and controlled I.V. solution temperatures.

### **Product Code**

THK-CTWB

## Pressure Cuff Infuser

Simply wrap around an I.V. bag and inflate the cuff to keep outward pressure on the fluid. 3 way stop cock to prevent air leaks.

### **Product Code**

TIN- INF-CUFF

# Powered Suction

## HK Aspirator

Super powerful performance, minimal noise.

The HK aspirator is a built for purpose liposuction machine of exceptional quality.

These much loved American style aspirators disappeared from the European Market for a few years as the USA manufacturers felt no inclination to acquire CE marking for our "little European market".

We kept receiving enquiries and the good news is..... A new CE marked beast of a Liposuction machine!

Weak suction, or suction slow to build up, not only slows down the procedure time but can result in increased tissue trauma.

The HK aspirator offers the power and peak suction speed so vital to this procedure.

*Please get in contact for full spec details.*

### Product Code

THK-ADP-111

## Aspirator Disposable Tubing

Vital to successful power suction. Thick walled non collapsible non slip tubing made from a remarkably strong but light Polymer mixture.

3 Metre lengths, Latex free.

### Product Code

FU 813300

## Cetta - Disposable one piece cannulae

High grade stainless steel shaft, for aspiration with powered suction.

Cetta Handle: POM

Powered Suction

### Mercedes

Three holes spaced evenly around the tip.

The most popular tip style world-wide.

### 30 Hole Harvest Cannula

Harvest fat for transfer in smaller parcels for easier re-injection, reduces blocking.

### Lantern

Chinese lantern shaped tip, useful for fibrous areas and popular in Gynecomastia procedures.

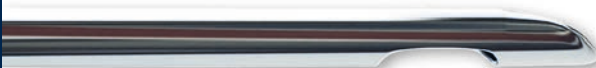

### The Scream

Two holes above a single hole all downward facing. A cannula lookalike of the famous Munch painting.

### Submental

One hole, flat, spoon backed for areas closer to the skin; such as chins, knees and ankles.

### One Hole

A single downward facing aperture.

### King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

A single downward facing aperture.

### King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

## Disposable Filter

The HEPA "High Alpha" 0.3 micron aspirator filter is a true high flow filter. The media is 144 square inches of pleated H.E.P.A fibreglass material. Under use with high powered aspirators the media will not tear or obstruct. The housing is moulded from an unbreakable virgin polycarbonate. At a DOP rating of 99.975%, the HFIFD will filter up to 225 litres of air flow per minute.

### Product Code

Filters

## Disposable Liner

The liner is composed of a drainage receptacle and cap in a one piece unit, thus eliminating leakage and allowing disposal with no open contact.

### Product Code

Liners

## Abbott Canister

The Abbott canister system is the most popular collection system used to date and is simple and easy to use. Reinforced container shell to stop implosion.

### Product Code

Canister

## Tubing to Luer Lock Adapter

Small disposable adapter that allows Luer Lock cannula to be attached to machine suction.

### Product Code

T530602

## Toomey to Machine Suction Adaptor

Turn your Toomey cannula into machine suction devices using this simple syringe adaptor.

### Product Code

TS-MSA

## Medela Dominant Flex

The Dominant Flex is Medela's latest innovation in high-vacuum suction. One-touch adaptable flow rates allow for a wider variety of procedures to be carried out with just one pump. Designed for use in hospitals, clinics and medical practices, the Dominant Flex is the optimal medical suction pump for all suctioning needs.

**Product Code**

TMED-DOMFLEX

## Medela Overflow Filter

To protect the pump from overflow, to protect the environment from bacteria or to neutralise odour.

**Product Code**

077.0571

## Medela Canister 2.5L

Reusable PC jars offer a clean, simple handling and efficient fluid management.

# Toomey Harvest

## Toomey Cannula

High grade Stainless steel shaft, for aspiration with 60cc Toomey syringes.

Primo Hub: Aluminium, Stainless Steel Shaft

Cetta Hub: Aluminium, Stainless Steel Shaft

### Mercedes Tip

Three holes spaced evenly around the tip.  
The most popular tip style world-wide.

### 20/30 Hole Harvest Cannula

Harvest fat for transfer in smaller parcels for easier re-injection, reduces blocking.

### Submental

One hole, flat, spoon backed for areas closer to the skin; such as chins, knees and ankles.

### Open Harvest

Guarded fully open tip, designed specifically for tissue harvest.

### King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

### Mercedes Tip

Three holes spaced evenly around the tip. The most popular tip style world-wide.

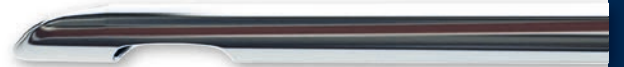

### Open Harvest

Guarded fully open tip, designed specifically for tissue harvest.

### Submental

One hole, flat, spoon backed for areas closer to the skin; such as chins, knees and ankles.

### King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

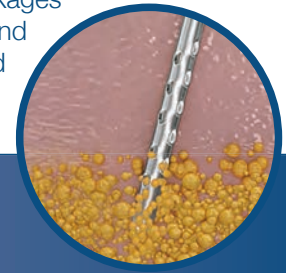

### 20/30 Hole Harvest Cannula

Harvest fat for transfer in smaller parcels for easier re-injection, reduces blocking.

# Cell Select

The ingenious Cell Select micro harvest cannula range is specifically designed to capture smaller aliquots of healthy fat cells via numerous 1mm micro-ports. The harvest of smaller cell packages results in easier, smoother re-injection through finer injection cannula. The spacing and increased surface area of the apertures per cannula tip results in an effective and constant collection speed, and greatly reduces blocking.

## W-Dissector

For undermining small areas of fibrous tissue, less aggressive and finer than V Dissector.

Product Code	Product Code	Diameter (mm)	Length (cm)
CETTA WDISS	PRIMO WDISS	16G	8.5

## Hay Tunnel Dissector

For blunt dissection tunnelling when a V Dissector may be considered aggressive i.e. around implants. Slight upward curve to tip in order to inhibit direct forceful contact, comfortable handle with orientation marking.

Product Code	Product Code	Diameter (mm)	Length (cm)
CETTA HTD	PRIMO HTD	2	12

# Injection Guns

## Cell Brush 3cc/10cc

Precise micro droplets delivery, removes pressure allowing even, controlled delivery. 10ml syringe delivers 0.50ml with each brush of the operators thumb. 3ml = 0.15 per brush.

Product Code	Capacity (cc)
CELLBRUSH3	3
CELLBRUSH10	10

## The Golden Gun 10cc

Thumb controller injection from 10cc BD syringe, eases the physical pressures of re-injection and controls accidental over filling.

Product Code	Capacity (cc)
PRIMO GG10	10

## Trigger Injection Gun 10cc/5cc

Trigger mechanism controlled injection from 10cc BD syringe or 5cc BD syringe (adaptor included) eases the physical pressures of re-injection and controls accidental over filling.

Product Code	Capacity (cc)
PRIMO TG105	5, 10

# Micro/Nano Filters

Want to reduce fat molecule size or filter fat for re-injection?

1

## Luer Lock to Luer Lock Transfers - Standard Hole

Simply use as a standard transfer adaptor tool between luer lock syringes.

Or for finer anaerobic re-injectable tissue start the process by working the graft through the adaptor from syringe to syringe around 20 times.

**Product Code**

**Product Code**

CETTA MIC/LL/LL

PRIMO MIC/LL/LL

Finer graft required, then:

2

## Luer Lock to Luer Lock Micro Adaptors

Decrease fat size further in stages using these specially drilled multi-holed adaptors for a graft consistency more easily injectable via fine facial needles.

Primo only

**Product Code**

PRIMO MFC/LL

Then finer still:

3

## Nano Fat Mesh Filter

This is designed to be used for very fine injectable grafts.

Re-usable outer case with sterile CETTA disposable mesh sets.

CETTA NDF

Mesh x 5 per pack

# Autologous Fat Filters

Popular and easy to use Container Systems

**Aquavage** is available in 1 or 2 litre containers, this is a sterile, single-use, closed system for high volume fat harvesting sitting as a link between patient and suction pump.

The Aquavage container uses fluid to float and separate adipose tissue, this allows the removal first of the fluid portion and then the fat cells from the container via a sterile and closed method. Fat is decanted from the bottom of the Aquavage system and can be injected straight back to the patient – no need for a centrifuge reducing any contaminants.

AQUAVAGE- STAND

### Filtron

We supply 100cc, 250cc 500cc.

Standard tumescent solution is infused. The Filtron unit is placed in line between the harvest cannula and the waste canister/suction source. Large volume units may be attached by the universal bracket to a sterile-draped canister stand. Small volume units may be placed in the sterile field. Suction pressure is reduced to 15”Hg and fat is drawn into the mesh filter within the canister. Waste and non-viable cells are pulled through the filter and are suctioned out to the waste canister via the removal tube. When the desired volume is collected, the FILTRON unit is then inverted and the transfer tube attached. The quality fat harvest is then drawn out directly into a luer lock syringe and is ready to re-inject. Sterile, fast, effective, quality harvest without exposure to ambient air.

# PUREGRAFT

A closed sterile system for the selective filtration of autologous grafts

The Puregraft filtration bags offer standardisation of result with ease of use. A very simple and ingenious system that offers superior separation of graft and allows the gentle preservation of the regenerative properties of fat.

- 1) Simply add syringe harvested lipo - aspirate
- 2) Wash tissue inside the bag with added lactated ringers
- 3) Drain away filtered waste, including free lipids and contaminants
- 4) Collect injection ready graft from the bag with your choice of luer lock syringe

# Compression Garments

## Arm garment

### CLG400 - Medium Sleeve Style Arm Cosmetic Surgery Compression

**Applicable Procedures:** Arm Lift, Arm Liposuction

**Features:** Designed for surgical procedures of the arm, with Velcro closure in the back and front. The sleeve length is slightly below the elbow.

- Provides optimal amount of compression to help improve the blood circulation, minimizes swelling after the procedure, and speeds up the healing process.
- Provides support to surgical areas for more comfort and helps the skin fit better to its new contours.
- Flushes the body out of potentially harmful fluids, allows patient to return to daily routines sooner.
- The garment can be worn with a full body garment for added upper body compression and has adjustable Velcro closures for more comfort and ease of application.
- Appropriate for liposuction and arm procedures (lift, reduction, brachioplasty), as well as for arm procedures following gastric bypass or bariatric surgery.
- Designed with Velcro closure on the back and front for extra support and compression around the shoulders and back area.
- Constructed with a high performance Compress TecSheen fabric that is long lasting and retains the garments shape and compression even under extended wear and washing.

NECK (Unisex)	13-15 IN 33-38 CM	15-17 IN 38-43 CM	17-19 IN 43-48 CM	19-21 IN 48-53 CM

**Applicable Procedures:** Browlift, Face Lift, Neck Lift, Liposuction (face, chin, neck), Chin & Jaw Augmentation, Genioplasty, Facial Implants, Anti-Snoring, Controlling Dry Mouth, Trauma Compression, Maxillofacial Surgery, Platysmaplasty, Oral Surgery, Coronal Lift, Submentoplasty, Submandibular Lipectomy, Mastoid Surgery, Cervicofacial Liposuction.

**Features:** UNISEX smooth compression facial garment designed chin strap with Velcro closure on top and medium neck support. This compression facial garment acts like a “dri-fit” breathable, latex free and antimicrobial which prevents odour and bacteria build up.

- Provides compression in the face, chin, neck areas and is appropriate for a face lift, neck lift, and liposuction.
- Improves blood circulation, minimises swelling after the procedure, flushes the body out of potentially harmful fluids, accelerates the healing process, and allows the patient to return to daily routines sooner.
- Ideal for use following a Face Lift, Neck Lift, Liposuction (face, chin, neck), Chin & Jaw Augmentation, Genioplasty, or Facial Implants surgery.
- Also provides support to surgical areas for more comfort and helps the skin fit better to its new contours.
- Features hook engage-able material on the outside enables you to adjust the right amount of pressure or support you feel most comfortable with.
- Easy pull on adjustable Velcro neck closures with ear open.
- Designed with a non-slip dome and a perfectly placed chin cup for continuous compression and support.
- Made of woven elastic anti-roll material for more durable compression and performance and has a soft plush side that feels comfortable against the skin. Moreover, the garment is made of pattern designs that target maximum support and compression.

### CLG100 - Chin Strap Support Compression Garment W/ Medium Neck Support

## Abdominal binders (unisex)

### CLG1350 - 12" Abdominal Plastic Surgery 4 Split Panel Binder

**Applicable Procedures:** Liposuction of the abdomen and flanks, Tummy Tuck, Lipoplasty, Hernia Surgery, Back Support.

**Features:** Designed with a Two panel Velcro closure.

- Made up of two 6" **SPLIT** panels (12" wide) for better flexibility which helps the skin fit better to it's new contours.
- Typically used by people with longer torsos following liposuction of the abdomen and flanks, tummy tuck or hernia surgery.

**R XL**

- Improves blood circulation, minimises swelling after the procedure, flushes the body out of potentially harmful fluids, accelerates the healing process, and allows the patient to return to daily routines sooner.
- Also provides support to surgical areas for more comfort and helps the skin fit better to it new contours.
- Constructed with woven elastic anti-roll material for more durable compression and performance.
- Features a soft plush side that feels comfortable against the skin.
- Garments have a hook engage-able material on the outside enables you to adjust the right amount of pressure or support you feel most comfortable with. It also allows the Velcro to attach anywhere on the binder for precise fit and even compression.
- Gives a soft & flexible Velcro hook for a tight snug fit that lasts.

### CLG310 - Male Abdominal Cosmetic Surgery Compression Vest CLG315 - Male Abdominal Cosmetic Surgery Compression Vest With Sleeves

**Applicable Procedures:** Abdominal and Chest Liposuction, Augmentation and Reconstruction

**Features:** Designed with a zipper in front, Velcro shoulder straps, and without sleeves

- This compression vest is designed ideal for use following Plastic Surgery, liposuction of the abdomen and flanks and is typically worn during Stage 1 of recovery (initial 1-2 weeks of post-op).
- Provides support to surgical areas for more comfort and helps the skin fit better to its new contours.
- Provides optimal amount of compression to help improve the blood circulation, minimises swelling after the procedure, and speeds up the healing process.
- Flushes the body out of potentially harmful fluids, allows patient to return to daily routines sooner.
- The anti-microbial treatment also helps retard growth of bacteria or fungus that can cause odor skin irritation, mildew or fabric degradation.
- Features a soft & flexible Velcro shoulder straps.
- Provides comfort, support and compression and is designed with a front zipper.
- Constructed with a high performance Comprexx Tecsheen fabric that is long lasting and retains the garments shape and compression even under extended wear and washing.

## Breast support

### CLG200 - Breast Surgery Support Bra W/1" Elastic Band

**Applicable Procedures:** Breast Augmentation (Breast Implants, Transaxillary Submuscular Breast Augmentation, Trans Umbilical Breast Augmentation), Breast Lift (Mastopexy), Breast Reduction, Breast Reconstruction, Latisimus Dorsi procedure, Mastectomy, TRAM Flap Procedure.

S M L XL XXL

- Ideal for use following plastic surgery and any breast procedure, this surgical bra provides optimal amount of compression to help improve the blood circulation, minimises swelling after the procedure, and speeds up the healing process.
- Provides support to surgical areas for more comfort and helps the skin fit better to its new contours.
- Flushes the body out of potentially harmful fluids, allows patient to return to daily routines sooner.
- The anti-microbial treatment also helps retard growth of bacteria or fungus that can cause odor skin irritation, mildew or fabric degradation.
- It is constructed with a high performance complex tecsheen fabric.
- The Complex Tecsheen fabrics are long lasting and retain their shape and compression even under extended wear and washing.
- Features a plush 1" elastic band with adjustable hook & eye shoulder straps.
- Also features a front hook & eye opening.
